

# University of Toronto- Public Water Map

Map of Water Fountains and Other Sources of Public Water on Central Locations on Campus

The red marks on the map represent buildings where there are sources of public water (water fountains, bottle re-fill stations, etc.). The list on the back of this map provides the name of the building as well as directions to water fountains in the building. Each letter value on the list represents a different location in the building. This map is part of an initiative promoting public water on campus. This initiative is a collaboration between the Public Water Initiative (PWI) and the University of Toronto Student Union (UTSU), with the support of other student groups and organizations on campus.
